

# ARMOR STRIPES

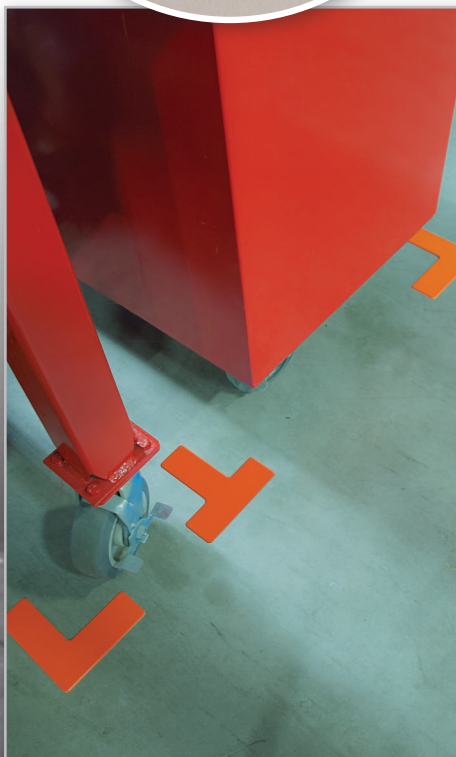

ArmorStripe offers an extremely durable system to aid in floor layout, sorting and workflow for 5S Lean manufacturing standards.

These markers are made from a through-color solid 0.055" thick rigid polyethylene surface with an ultra tacky heavy coat weight adhesive backing. They will adhere to most any clean smooth surface with a very high tack bond while offering a low residue removal from most applications.

Available in an assortment of stock sizes and colors with custom options available.

Edges of all shapes have been tapered to reduce wheel impact. Solid through-color plastic offers extended durability.
